

A woman with long dark hair, wearing an orange blazer over a light blue shirt and a lanyard, is speaking into a microphone. She is gesturing with her right hand raised. The background is a dark blue, futuristic setting with glowing white lines and patterns, resembling a digital or AI environment. A white curved line graphic is on the right side of the image.

SAP Capability Gen AI & Business AI

Capgemini's investments in Business AI and Gen AI, to Drive Transformational Delivery for our clients

Capgemini commits **€2 billion** to Artificial Intelligence to fortify its leadership in this groundbreaking field, prioritizing responsible, reliable, and sustainable deployment. We're crafting industry-tailored solutions and forging strategic alliances with **SAP, Microsoft, AWS, GCP, and other key partners like Mistral.AI**

The four pillars of our Capgemini group offerings on Business AI and Gen AI

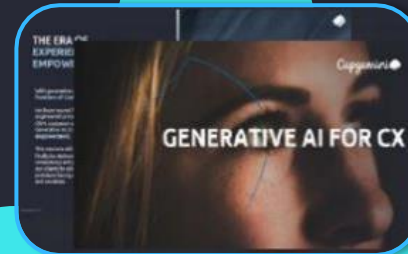

Gen AI Strategy

Enables CXOs to define and prioritize the relevant Gen AI use cases for their business and lay the right foundations in terms of people, process, and technology for scaling their investments while mitigating the risks.

Custom Gen AI for Enterprise

We help enterprises move from a standard risk usage of generic public large models to a tailored and trusted solution based on the use of their data and company knowledge, with reliable outputs creating significant tangible outcomes.

Gen AI for Customer Experience

Enhances CX with 4 dedicated Gen AI assistants: self-service with personalized chatbots, augments customer care services to boost sales team's performance with a product & offers knowledge assistant.

Gen AI for Software Engineering

Helps improve efficiency and quality across the whole SAP software lifecycle, accelerate the time to market for new SAP implementations, and reduce the enterprises' technical debt.

Capgemini's long-standing partnership with SAP is expanding

This new collaboration will empower organizations to address critical challenges by implementing Generative AI across various domains, including HR, Sales, Procurement, Sustainability, and beyond.

What makes this partnership special:

- Our expertise in Data and AI, along with our industry-leading Gen-AI solutions and extensive experience in Large-scale SAP transformations.
- SAP's robust Business AI portfolio, which includes services based on the SAP Business Technology Platform and SAP Joule.

As part of the extended partnership, we will be expanding our dedicated Global SAP Practice to incorporate three dimensions to realize business value:

- Augmenting business processes using Business AI & Gen-AI
- Accelerating Go-to-market
- Upskilling of workforce

“ Over the past 18 months alone, generative AI has transformed the way organizations operate. Capgemini is further developing its capabilities and expanding its partner network to best support our clients through the next wave of this transformative technology, where implementation at scale is critical.

This expanded partnership with SAP will help clients efficiently adapt their business processes, setting them up for success in the short- and long-term. With over four decades of experience in delivering value with SAP, and our proven leadership in data and AI, organizations can rely on our expert teams to unlock the full potential of generative AI and transform their core business functions.”

Naru Balasubramaniam,
Global Head of
Ent. Package Based
Solutions at Capgemini

“ We highly appreciate Capgemini's dedication to SAP Business AI. Together, we will keep enhancing business applications and processes, based on SAP Business Technology Platform and our AI Services, to suit our clients' needs. We are excited to expand our partnership with Capgemini and work together to combine SAP's Business AI portfolio with Capgemini's industry expertise to create new and innovative features that will help clients rethink their business processes.”

Dr. Philipp Herzig,
CTIO & Chief AI Officer
at SAP SE
